

XII INTERNATIONAL SYMPOSIUM ON APHIDS

13-17th October 2025

PyeongChang (Alpensia), Korea

Scientific Program

- Aphid diversity and integrative taxonomy
- Aphid species distribution: invasion and endemism
- Aphid phylogeny: species diversification and biogeographic history
- Aphid behavior, ecology and evolutionary biology
- Aphid interactions with their symbionts and natural enemies
- Aphid-plant interactions
- Molecular and physiological mechanisms governing aphid biology
- Aphids as virus vectors
- Management strategies of aphids on crops

Organized by Seunghwan Lee,
Seoul National University, Korea
(seung@snu.ac.kr)
